This course will walk you through the configuration process of Proofpoint Supervision while explaining features and exploring use cases to suit your needs. The course provides both instruction and hands-on experience. You will create and configure a compliance division; create flagging and sampling rules; and create risk-based policies that allow you to add monitored staff, rules, and review team members. You will also explore and configure different workflow options and use tools to improve review efficiency. You will learn how to use reporting for monitoring, improving rule effectiveness, and identify staff and rules with higher confirmed flags. The course also shows administrators the tasks performed by reviewers via the Dashboard, Message Review, Past Review, and Search. At the conclusion of the course you will receive reference material for future use.
